An example of using many bibtex files

Henry T.H. Tu

01-jan-2016

1 Testing the citations

If you see question marks, it does not work. If you see numbers in square brackets, it works. [34, 41]

2 Downloading the bibtex files

You can go to http://dblp.uni-trier.de/pers/ to choose one person and download all the citations

3 Using the bibtex files

Include all the files with the command \bibliography{file1,file2,file3}

References
